## About

Our Premium Wood Floating Dock is a great choice when seeking a traditional look, with unmatched value. We achieve this by using the highest quality materials available and utilizing efficient manufacturing methods paired with the strongest hardware in the industry. The Premium wood floating dock will accommodate any water depth and maintain a consistent Freeboard above water when fluctuation occurs.

## Floatation

There are two types of float options available in our Premium Wood Floating Docks. The most common being HDPE plastic box floats filled with closed-cell foam, known for incredible stability in mid to low wave action. Second, being our Premium Pontoons. These are known for their lifetime warranty and ability to cut through larger waves with ease.

Note: Sizes shown are standard sizes, customize sizes available upon request
